

RODGERS

World Leader in Stereo Imaged Church Organs and Pipe/Digital Organs

Our Organs

Rodgers Builds ...

The Trillium Masterpiece Series, the pinnacle of digital organ design. For beauty and realism of tone, adaptability in supporting a variety of worship styles, leading edge digital design technology, and the widest array of customizable options and specifications ever offered in any digital organ, the Trillium Masterpiece Series by Rodgers stands alone. After years of intensive research and development by Rodgers Instruments LLC, a superior organ with magnificent beauty for the listener to enjoy and the organist to play, is now available only from Rodgers.

Reference standard quality, stereophonic digital organs prepared to play all-digital or with pipes in our Trillium Series Organs.

The two manual, handcrafted, Allegiant Series organs - dowel pin constructed console organs with Trillium level keyboards and reed switch pedalboards, premium audio, and custom organ voicing that makes them ideal for chapels, smaller churches or residences.

Insignia Series, value-priced organs offering many of the features of our larger organs, at lower price levels.

Custom four and five manual organs, all one of a kind instruments, designed only for you.

Audiophile quality amplifiers and speakers designed for pro audio quality clean, undistorted organ sound radiation and an extremely long-life, trouble-free operation.

Rodgers builds accessories such as the MX-200 Sound Module with realistic, Rodgers Pipe Organ samples designed to complement any organ's specification and "Hector Olivera" orchestral voices. This module is a tremendous upgrade to any organ, pipe or digital, using the General MIDI Standard. Rodgers also offers the RSS-303A Ambience System that provides quadraphonic room modeling capabilities to previous generation Rodgers organs and pipe organs, and other popular organ accessories.
